To ensure the excellent quality and safety , we insist to use 100 % HDPE plus dried wood or bamboo powder with safe high quality chemical additives.The powder is extruded to dough like consistency and then extruded to the desired shape.Additives such as colorants ,coupling agents , stabilizers ,blowing agents ,reinforcing agents , foaming agents,lubricants help tailor the end product to the target area of application.

With up to 60% cellulose content , wood-plastic composite(WPC) behave like wood using conventional woodworking tools.At the same time,they are extremely moisture-resistant.There is little or no water present,thus increasing resistance to rot.

The environment friendly WPC outdoor products we produced are made of :

- 35% HDPE(Grace A Recycled HDPE)
- 60% Bamboo or Wood fiber(Professionally treated by dry bamboo or wood fiber)
- 5% Chemical Additives (Including Anti-UV agent ,Anti-oxidation agent, stabilizers, colorants,anti fungus agent,coupling agent,reinforcing agent,lubricants,etc.)

Our WPC profile is an ideal substitute for WOOD or PLASTIC in many projects. People can benefit from HOH Ecotech® by following attributes:

- Dimensional stability, longevity, natural feel
- Stable over a wide temperature range,weather-resistant
- High impact resistant
- Environmentally friendly, Recyclable
- Easily produced and easily fabricated
- Contains no toxic chemicals or preservatives
- Resistance to rot and crack
- Moisture resistant, Low flame spread
- Outstanding screw and nail retention
- Broad rang of finishes and appearance
- UV resistance,Durable
